RELIEF
WALL COVERING

Wall'in

Wall'in is pleased to present its range of ecological panels Cocomosaic. These panels are designed and manufactured only with natural products, from coconut peels and teak. There is a real commitment to nature, but also a sensitivity for human work. Indeed, Cocomosaic allows every man to work at equal opportunity, especially people in extreme poverty but also those with reduced mobility.

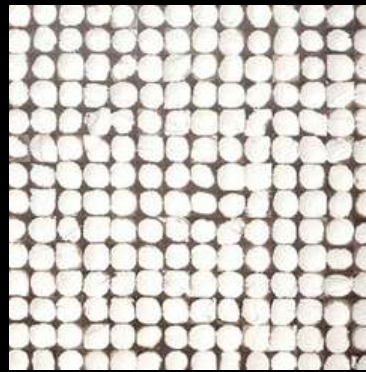

The coconut panels harmonize with all style of ambiance: natural, classic, contemporary or offbeat. The slabs are very resistant, rot-proof and water-repellent, allowing you to leave your creativity free as they are suitable for any type of room, such as a living room, bedroom or bathroom. Add to that a light on the panels, and you will bring out the reliefs by a play of shadow of the nicest effect.
